## Design Notes

Bar chart: horizontal bars let department names stay readable; budget/actual pairs invite direct visual comparison per row.

Donut: shows vendor concentration risk at a glance — top 5 vendors + Other slice flags reliance on a small supplier base.

Line: time trend fits a continuous x-axis (months) better than bars; area fill aids reading magnitude at a glance.

Table: raw ranked figures for the specific over-budget projects finance needs to act on this cycle.
